Ex. 6 - Personal Privacy

EPA, Underground Injection Control has primacy on injection and disposal. I contacted their office and was informed they have had a number of inquiries. No permit applications have been submitted. Although, they have approved 1 or 2 injectivity test which have not been done yet. For more information regarding injection it would be best to contact EPA.

I am trying to find out if there are any permits for injection wells in Susquehanna county. Last year I heard the geology would not support it but now I heard every 100 gas wells will require an injection well- we have 32 drilled and 68 planned here in our area and if I add those numbers- well there you have it. Please give me an answer asap since there is a public comment period and we would like to know about it- we have been victimized by misinformation and failure to disclose the true nature and size of this "project" since 2005-2006. Sincerely, Ex. 6 - Personal Privacy Dimock PA
